Nordic iLibrary Co-operation

User Guide

About Nordic iLibrary

The Nordic co-operation is one of the world's most extensive forms of regional collaboration, involving Denmark, Finland, Iceland, Norway, Sweden, the Faroe Islands, Greenland, and Åland.

Nordic publications play a key role as the outcome of the many projects and activities fostered and financed by the Nordic co-operation. Being primarily research-based analyses the publications form the basis for political decisions in the Nordic co-operation.

Every year around 100 new Nordic titles are published, approximately 65% of which are in English. They cover all the subjects that are part of the Nordic co-operation with particular focus on environmental studies, green growth, education, sustainable development, health and social welfare.

Nordic iLibrary has been developed in partnership with OECD Publishing as part of the iLibrary Partnership.

My Favorites

To add content to 'My Favorites', click on the green star icon.

You can print, email or download your favorite items by clicking the 'My Favorites' tab at the top of any page. Your favorites stay in your list for the duration of your browser session. If you have a personal profile, the items in your 'My favorites' list will be saved for later.

Click on 'Less' or 'More' to see summaries of the series, title or chapter

3 Content is segmented at a granular level, for example, you can choose to access only the summary of this publication in both PDF and READ formats.

8

Use the options on the right side to:

- 'Buy This Book' from the Nordic Council of Ministers' site
- 'Cite This Publication': A pop-up window will appear to display the recommended form of citation. You can also download the citation data for a variety of bibliographic reference tools.

Stimulating Textile-to-Textile Recycling

Extending the active lifetimes of textile products should be prioritised in efforts to reduce the environmental impacts of textile production. However, once textiles are worn out, recycling them back into new textile products is environmentally advantageous compared to incineration or landfill. A number of Nordic brands have been venturing out on pathways towards textile-to-textile recycled through designing for ease of recycling and thus increase potential supply, and through us recycled materials in new products. This report compares the experiences of eleven of these and documents their motivation, challenges they've experienced and the strategies they've used to overcome these. The report is published in parallel with a case wallet and aims to inspire other brands to engage in closed loop thinking.

The indicator can be cited or shared via email using the buttons on the top right of the page.

Culture

Culture is one of the main components of co-operation beween the Nordic countries, and has long acted as a bridge, improving understanding of the neighbouring peoples and the shared values. The policies of the Nordic countries with respect to cultural life, mass media and religion have many features in common. However, some differences may be pointed out - for instance, cultural institutions arising from historical circumstances. In both Denmark and Sweden, there are cultural institutions with roots in the traditions of the royal courts. In these countries, national institutions formed for foundation of cultural life at an early stage while, in Norway, cultural institutions began to form later. Indicators

Add to Favorites

This indicator shows visits tomuseums per 1 000 inhabitants in the Nordic region. A museum is defined as: An institution with a collection worthy of conservation, with public access, the collection should be under supervision and there should be monitoring at the entry point during opening hours. Museums include national museums and affiliated institutions, local museums, and scientific museums. The number of visits is monitored physical visits at location. Faree islands: Data only covers national museums not local museums. For more information: http://91.208.143.100/pxweb/norder/pxweb/en/Nordic%20Statistics/

Visits to museums
