About UN iLibrary

The United Nations iLibrary provides librarians, information specialists, scholars, students, policy makers, influencers and the general public with a single digital destination for seamlessly accessing publications, journals, data, and series published by the United Nations Secretariat, and its funds and programs.

Every year around 500 new titles are planned to be added to United Nations iLibrary covering a wide range of the UN's priority issues such as international peace and security, human rights, climate change, economic and social development.

The UN iLibrary has been developed in partnership with OECD Publishing as part of the iLibrary Partnership.

2016
2015
2014
2013
The Yearbook series is a result of collaborative efforts by major African regional organizations to set up a joint data collection mechanism of socioeconomic data on African countries, as well as the development of a harmonized database. It seeks to promote wider use of country data, reduce costs, significantly improve the availability and quality of the data, and lead to better monitoring of development initiatives on the continent.
